Introduction: The Problem Nobody Talks About

You became a padel trainer because you love the sport.

You love being on the court. You love watching a student finally nail that vibora. You love the energy of a packed club on a Saturday morning.

What you did NOT sign up for: spending 3 hours a day glued to your phone, answering the same 12 questions over and over again.

"What's the price for a private lesson?"
"Can I book Tuesday at 6pm?"
"Is the indoor court available this week?"
"Do you offer group classes for beginners?"
"How do I cancel my booking?"

If you have more than 20 students, this is your daily reality. And it's slowly killing your productivity, your energy, and honestly — your love for the job.

Here's the hard truth: **You're not a secretary. You're a coach.**

This playbook is about fixing that. Not with some complicated enterprise software that costs €500/month. Not with a virtual assistant you have to train for weeks. But with a simple AI setup you can build in 30 minutes — using tools that already exist, most of them free.

What You'll Get From This Guide

By the end of this playbook, you will have:

- A clear understanding of exactly where your time is going (spoiler: WhatsApp)
- A working AI agent that handles the 5 most common requests automatically
- Step-by-step setup instructions — even if you've never touched an API in your life
- Real message templates you can copy-paste today
- A 30-minute checklist to get your first automation live tonight

Who this is for:
- Padel coaches with 15+ regular students
- Club managers handling bookings for multiple courts
- Anyone who has their phone in their hand more than a racket during work hours

Who this is NOT for:
- Coaches with fewer than 10 students (manual is fine for now)
- Clubs with a proper booking software already integrated into WhatsApp

Time investment to set up: 30 minutes for the basics. 2 hours to go fully automated.

Monthly cost: €0–15 depending on message volume.

Let's get into it.

Chapter 1: Why WhatsApp Is Killing Your Productivity

Before we fix the problem, we need to stare at it directly. Most coaches underestimate how much time they're actually losing.

Let's do a quick audit.

The Time Audit

Pull up WhatsApp right now. Scroll back through the last 7 days. Count:

1. How many messages did you receive that were booking requests?
2. How many were price inquiries?
3. How many were cancellations?
4. How many were the same question you answered at least 3 times?

If you're like most coaches we've talked to, you'll find that **60–70% of your WhatsApp messages are repetitive and could be answered by a simple automated system.**

Now multiply that by 7 days. Then by 52 weeks. That's hundreds of hours per year spent on messages a €0 AI could handle.

Pain Point #1: The Constant Interruption Loop

Here's what a typical morning looks like for a coach without automation:

7:15 AM — You're having coffee. Phone buzzes. *"Hey, do you have a slot this Saturday at 10?"* You unlock your phone, check your calendar (which is probably a Google Calendar or a notebook), type back a response. 4 minutes.

7:22 AM — Another message. *"Same question, different student."* Another 3 minutes.

7:45 AM — You're on the court warming up. Phone is in your pocket. It buzzes. You ignore it. It buzzes again. You check. *"Are you free tomorrow?"* You can't respond now. You feel the anxiety of an unanswered message.

9:30 AM — Lesson ends. You have 15 minutes before the next one. You open WhatsApp. 8 new messages. You speed-respond to all of them. 12 minutes gone.

By noon, you've interrupted your focus state **7–12 times** just for messages. Research shows it takes an average of **23 minutes** to fully regain deep focus after an interruption. You never really get there.

Pain Point #2: Bookings That Fall Through the Cracks

The problem with manual WhatsApp bookings isn't just time. It's errors.

You get a message at 8 PM: *"Can I book Thursday 7 PM?"* You say yes. You forget to mark it in your calendar. Thursday comes. You have two students at 7 PM.

Or worse: You say no to student B because you think Thursday is full — but it's actually Friday that's double-booked.

One study of freelance service providers found that **manual scheduling creates a booking error rate of up to 15%**. For a padel coach with 30 sessions per week, that's 4–5 errors every week. Each one costs you either a student's trust or a lost session fee.

Pain Point #3: The "Off Hours" Problem

Students don't respect your working hours. They text at 11 PM on a Sunday. They text during your lessons. They text on public holidays.

And because you're a professional who cares about your students, **you feel obligated to respond quickly.** Even when you shouldn't have to.

This bleeds into your personal life. Your family notices. Your sleep suffers. You check your phone first thing in the morning and last thing at night — not because you want to, but because if you don't, the backlog becomes overwhelming.

An AI agent doesn't have this problem. It responds in 3 seconds at 2 AM on Christmas Day. It never complains. It never burns out.

Pain Point #4: Pricing Confusion and Awkward Negotiations

"How much for a private lesson?"

Simple question. But here's what happens for most coaches: You answer, they say "oh that's a bit expensive," and now you're in an awkward negotiation over WhatsApp. Or you have different prices for different clients and you have to remember who gets which deal.

An AI agent can deliver your pricing in a clean, professional format — with clear options — every single time, without you having to be the one saying the number. It feels less personal, which actually makes pricing conversations **less awkward**, not more.

Pain Point #5: The Admin Pile-Up Before Vacation

You're trying to take a week off. But before you go, you need to:

- Tell all your students you're not available
- Handle all the rescheduling requests
- Set up coverage if needed

- Make sure no one books a session during your absence

This alone can take 2–3 hours. With an automated system, it takes 10 minutes: update your availability, change one message template, and your AI handles the rest.

The Math Is Simple

Let's be conservative. You spend **1.5 hours per day** on WhatsApp admin tasks. That's:

- **10.5 hours per week**
- **42 hours per month**
- **504 hours per year**

If your coaching rate is €40/hour, that's **€20,160/year** in lost earning potential. Just from WhatsApp.

Even if you get back only **50% of that time**, and use it for one extra lesson per day — that's €200–300 extra per week.

This guide costs €19. The ROI is calculated in hours, not weeks.

Chapter 2: The 5 Most Common Requests — And How to Automate Them

Before we build anything, we need to understand what to automate. In our experience building AI agents for padel coaches, **80% of all WhatsApp messages fall into 5 categories.**

Here they are, with example messages and what a good automated response looks like.

Request Type 1: Booking a Session

What they say:
- *"Can I book Saturday at 10?"*
- *"Do you have anything free this week?"*
- *"I want to schedule a lesson for two people, when are you free?"*

What your AI responds:

> *Hi! Thanks for reaching out* 👋
>
> *To check my availability and book a session, here are your options:*
>
> 📅 **Book online:** *[your booking link]*
> 📅 **Next available slots this week:**
> *- Tuesday 18:00–19:00*
> *- Thursday 17:00–18:00*
> *- Saturday 09:00–10:00*
>
> *Reply with your preferred slot and I'll confirm it for you. Or just say* **"available"** *to see the full week.*

Why this works: It answers the question immediately, gives concrete options, and tells them exactly what to do next. No back-and-forth required.

Request Type 2: Price Inquiries

What they say:

- "How much do you charge?"
- "What's the price for group lessons?"
- "Do you have packages?"

What your AI responds:

> *Here are my current rates:*
>
> 💰 **Private Lessons (1-on-1)**
> *- 60 min: €60*
> *- 90 min: €80*
>
> 👥 **Group Lessons (2–4 players)**
> *- 90 min: €35 per person*
>
> 📦 **Packages (10% off)**
> *- 5 private lessons: €270*
> *- 10 group sessions: €315 per person*
>
> 🎓 **Beginner Course (6 weeks)**
> *- €149 per person (groups of 4–6)*
>
> *Want to book a session or have questions about what's right for you? Just reply here!*

Why this works: Price is presented clearly, no negotiation needed. The package pricing creates natural upsell opportunities.

Request Type 3: Availability Check

What they say:

- *"Are you free this weekend?"*
- *"What are your hours?"*
- *"Can you do evenings?"*

What your AI responds:

> *My availability this week:*
>
> 📅 **This Week (Mar 10–16)**
>
> *Mon: 17:00–20:00* ✅
> *Tue: 16:00–20:00* ✅
> *Wed: FULL* ❌
> *Thu: 17:00–20:00* ✅
> *Fri: 16:00–19:00* ✅
> *Sat: 09:00–12:00* ✅
> *Sun: 10:00–13:00 (limited — 1 slot left)* ⚠️
>
> *Reply with your preferred day and time and I'll lock it in!*

Why this works: Clear, visual, no ambiguity. Students can make a decision immediately.

Request Type 4: Cancellations and Reschedules

What they say:

- *"I need to cancel Thursday"*
- *"Something came up, can we move my lesson?"*
- *"Can I reschedule?"*

What your AI responds:

> *No problem, I've noted your cancellation request for Thursday 18:00.*
>
> 📋 **Cancellation Policy Reminder:**
> *- Cancelled 24h+ in advance: Full refund / free reschedule* ✅
> *- Cancelled less than 24h: 50% credit toward next session*
>
> *Would you like to* **reschedule** *for another slot this week? Here's what's available:*
> *- Tue 18:00*
> *- Sat 09:00*
>
> *Just reply with your preference!*

Why this works: Policy is communicated automatically — no awkward conversation, no exceptions by accident. Student can reschedule in the same conversation.

Request Type 5: General Info / FAQ

What they say:

- *"Where are the courts?"*
- *"Do I need to bring my own racket?"*
- *"Is there parking?"*
- *"What level am I?"*

What your AI responds (FAQ-style):

> *Here's everything you need to know:*
>
> 📍 **Location:** *Padel Club Ibiza, Av. de la Paz 14, Santa Eulalia*
> 🅿️ **Parking:** *Free parking available behind the club*
> 🎾 **Equipment:** *Rackets available to rent for €5. Bring your own balls or buy them here (€4/tube)*
> 🦶 **What to wear:** *Sports shoes with lateral support. Padel shoes recommended but not required for beginners.*
> 📱 **Level check:** *Not sure about your level? Text "LEVEL CHECK" and I'll send you a quick 5-question quiz.*
>
> *Anything else? Just ask!*

Why These 5 Cover 80% of Your Inbox

We analyzed message logs from three padel coaches over 30 days. Here's the breakdown:

Request Type	% of Messages
Booking requests	34%
Price inquiries	18%
Availability checks	14%
Cancellations/reschedules	9%
General FAQ	7%
Total automatable	**82%**

Only 18% of messages actually require your personal attention. Everything else? Your AI handles it.

Chapter 3: Your First AI Agent — 30-Minute Setup

Alright. Let's build this thing.

No coding required. No technical background needed. If you can set up a new iPhone, you can do this.

What You'll Need

Before you start, make sure you have:

1. **A WhatsApp number** — either your existing business number or a new one
2. **A Twilio account** — free to sign up at twilio.com
3. **A smartphone or tablet** to test with
4. **15 minutes of uninterrupted time** (seriously — put the phone down for 15 minutes)

Optional but recommended:
- A Google Sheets spreadsheet for your availability
- A simple booking link (Calendly free tier works perfectly)

Step 1: Create Your Twilio Account (5 minutes)

1. Go to **twilio.com** and click "Sign up"
2. Enter your name, email, and create a password
3. Verify your phone number (Twilio will call or text you)
4. On the dashboard, you'll see your **Account SID** and **Auth Token** — copy these somewhere safe. You'll need them later.

> 💡 **Free tier:** *Twilio gives you a trial credit ($15) which is enough for testing. A production setup for 200 messages/month costs roughly €5–8.*

Step 2: Activate the WhatsApp Sandbox (5 minutes)

The Sandbox is Twilio's testing environment for WhatsApp. It lets you send and receive real WhatsApp messages without needing official WhatsApp Business API approval.

1. In the Twilio Console, go to **Messaging → Try it Out → Send a WhatsApp Message**
2. You'll see a screen with a phone number (looks like: `+1 415 523 8886`)

3. You'll also see a join code like: `join [word]-[word]`
4. On your phone, **send that join code** to the Twilio sandbox number via WhatsApp
5. You'll get a confirmation: *"You are now connected to the sandbox"*

You're now connected to a WhatsApp channel.

Step 3: Set Up Your First Auto-Response (10 minutes)

Now we'll create the actual responses. Twilio has a feature called **Webhook** — a URL that WhatsApp calls every time someone sends you a message. We'll create a simple response system.

Option A: Use a No-Code Tool (Recommended for Beginners)

The easiest option: use **n8n** (free, self-hosted) or **Make.com** (free tier available).

We'll use Make.com for this example:

1. Sign up at **make.com** (free)
2. Create a new **Scenario**
3. Add a **Webhook** module as your trigger
4. Copy the webhook URL Make gives you
5. Paste that URL into your Twilio WhatsApp Sandbox settings (under "When a message comes in")
6. Add a **WhatsApp (Twilio)** module as your action
7. Configure it to send your auto-reply message

When someone messages your WhatsApp number, Make receives it, processes it, and sends back your reply. Automatically.

Option B: Use the Pre-Built Template (Recommended for This Guide)

We've created a simple Make.com template that handles all 5 request types automatically. It uses keyword detection to route messages to the right response.

Download the template from the bonus section of this guide, import it into Make.com, and you're done.

Step 4: Configure Your Responses (10 minutes)

Now customize the actual messages. In Make.com (or your chosen tool), create the following keyword triggers:

If message contains...	Send this response
"book", "booking", "schedule"	→ Booking response template
"price", "cost", "how much", "rate"	→ Pricing template
"available", "free", "when", "availability"	→ Availability template
"cancel", "cancellation", "reschedule"	→ Cancellation template
"where", "location", "parking", "racket"	→ FAQ template
(anything else)	→ General greeting + menu

For each keyword group, paste the response templates from Chapter 2 (personalized with your details).

Step 5: Test It (5 minutes)

Send a test message to your WhatsApp sandbox number. Try:

- *"How much do you charge?"* → Should get pricing response
- *"Are you free Saturday?"* → Should get availability response
- *"I need to cancel"* → Should get cancellation response

If something doesn't work — check the Make.com scenario logs. They show exactly what happened and where it went wrong.

Moving to Production (WhatsApp Business API)

Once your sandbox is working, you'll want to apply for official WhatsApp Business API access to use your own number. This typically takes 2–7 days and requires:

1. A **Facebook Business Manager account** (business.facebook.com)
2. A **verified business** (can be a sole proprietorship)
3. A **phone number** not currently active on WhatsApp

Apply through Twilio's dashboard under "Senders → WhatsApp Senders." Follow their guided process — they'll walk you through Meta's approval.

> 💡 **Pro tip:** *While waiting for approval (which can take a few days), you can keep running the sandbox with a separate test number. Your students won't know the difference during testing.*

Connecting Your Calendar (Optional but Powerful)

To show real-time availability, connect your Google Calendar:

1. In Make.com, add a **Google Calendar** module
2. When a "booking" message arrives, the scenario checks your calendar for free slots
3. It returns only the genuinely available times to the student

This eliminates double-bookings completely. The AI only offers times that are actually free.

Chapter 4: Advanced Automation

Once the basics are running, you can layer in more powerful automations. These are optional — but each one saves you significant time.

Automation 1: The Morning Briefing

Every morning at 7:30 AM, your AI sends you a WhatsApp message with:

- Today's sessions (time, student, type)
- Any pending booking requests that need your attention
- Any cancellations received overnight
- Tomorrow's schedule preview

What it looks like:

> 🌅 **Good morning! Here's your day — Tuesday, March 12**
>
> **Today's Sessions:**
> ⏰ *10:00 — Private | Carlos M. | Court 2*
> ⏰ *12:00 — Group (4 players) | Beginner | Court 1*
> ⏰ *17:00 — Private | Sarah L. | Court 3*
> ⏰ *19:00 — Private | Ricardo P. | Court 2*
>
> **Pending (needs your response):**
> ⚠️ *1 new booking request from Ana García — awaiting confirmation*
>
> **Overnight cancellations:**
> ❌ *Jorge M. cancelled Thursday 18:00 → slot now open*
>
> *Have a great day on the court!* 🎾

Setup: In Make.com, create a Scheduled Scenario that runs daily at 7:30 AM. It reads your Google Calendar, checks for pending items, and sends you a WhatsApp summary.

Automation 2: Automated Payment Confirmation

After a session, your AI sends a payment reminder with the amount owed and your payment details:

Triggered 30 minutes after a session ends:

> *Hi Carlos! Thanks for the great session today 🎾*
>
> *Here's your session summary:*
> *📅 Tuesday, March 12 — 10:00–11:00*
> *💶 Amount: €60 (1-hour private lesson)*
>
> *Payment options:*
> *🏦 Bank transfer: ES12 3456 7890 1234 56789*
> *📱 Bizum: +34 600 123 456*
> *💳 Card: [payment link]*
>
> *Receipt will be sent once payment is confirmed.*
> *See you next time! 🚀*

Why this is powerful: Most coaches hate chasing payments. This automates the awkward *"by the way, you still owe me..."* conversation entirely. Students appreciate the clear summary. Your cash flow improves immediately.

Setup: Create a Google Calendar trigger in Make.com. When an event ends (your session), it waits 30 minutes, then sends the payment message to the student (you store their WhatsApp number in the calendar event notes).

Automation 3: Booking Confirmation + Reminder Sequence

When a student books a session, they automatically receive:

Immediately: Booking confirmation

> **✅ Booking Confirmed!**
>
> *📅 Thursday, March 14*
> *⏰ 18:00–19:00*
> *📍 Padel Club Ibiza — Court 3*
> *🎾 Coach: Marco*
>
> **What to bring:**
> *- Sports shoes (padel shoes recommended)*
> *- Water bottle*
> *- Comfortable sports clothes*
>
> *Need to cancel or reschedule? Text "CANCEL [date]" and I'll handle it.*

> *See you Thursday!* 🐸

24 hours before: Reminder

> ⏰ *Reminder: You have a padel lesson tomorrow at 18:00!*
>
> 📍 *Padel Club Ibiza — Court 3*
>
> *Any issues? Reply here and we'll sort it out.*

2 hours before: Final reminder

> 🎾 *Almost time! Your lesson starts in 2 hours — Court 3, 18:00.*
>
> *Looking forward to it!*

Why this matters: No-shows drop dramatically. Students feel professionally treated. You spend zero time sending reminders manually.

Automation 4: Waitlist Management

When all your slots are full, your AI adds students to a waitlist and notifies them automatically when a slot opens:

> **All slots are currently full for this week.**
>
> *Would you like to join the waitlist? If a slot opens, you'll be the first to know.*
>
> *Reply* **"WAITLIST YES"** *to be added.*

When a cancellation comes in:

> 🎉 *Good news! A slot just opened up:*
>
> **Saturday, March 15 at 10:00**
>
> *Reply* **"BOOK IT"** *within 2 hours to claim it. After that, the next person on the list gets notified.*

This is gold. Coaches with full schedules typically lose 1–2 sessions per week to cancellations they can't fill manually. Automated waitlists recapture that revenue automatically.

Automation 5: Post-Session Feedback

48 hours after each session, your AI sends a quick feedback request:

> *Hi Carlos! How was your lesson on Tuesday?* 🎾
>
> *Quick question — rate your session:*
> *5⭐ — Loved it!*
> *4⭐ — Good, some things to improve*
> *3⭐ — Average*
> *2⭐ — Wasn't great*
> *1⭐ — Not happy*
>
> *Your feedback helps me improve. Just reply with a number!*

Positive responses (4–5 stars) trigger a follow-up:

> *Awesome! Glad you enjoyed it* 🙌
>
> *If you have a moment, a quick Google Review would mean a lot:*
> *[review link]*

This builds your online reputation automatically, with zero effort.

Chapter 5: Real-World Examples

Theory is great. Real stories are better. Here's how three coaches are using AI automation in practice.

Marco — Ibiza Padel Club

Background: Marco runs 20–25 sessions per week at a premium club in Santa Eulalia, Ibiza. He has 45 active students and runs group clinics plus private lessons.

The problem: His summer season (May–October) is insane. Tourists, locals, expats — everyone wants lessons. He was getting 60–80 WhatsApp messages per day during peak season. He nearly quit coaching to become full-time admin.

What he automated:
- Pricing and availability responses
- Booking confirmations with court assignments
- Daily morning briefing
- Payment reminders after each session

The result: *"I went from 2.5 hours of WhatsApp per day to about 20 minutes. I use those hours to prep better lessons, hit the gym, or just actually rest. My response time for students went from average 3 hours to instant. And my income went up €400/month because I stopped losing bookings that fell through the cracks."*

One unexpected bonus: The professional confirmation messages increased his premium positioning. Students who were on the fence about his price point now perceive him as more organized and worth it.

Ana — Club de Padel Mallorca

Background: Ana manages a 6-court club in Mallorca and coordinates 4 external coaches. She handles all the club's WhatsApp inquiries herself — bookings for all courts, all coaches, rental equipment, and group event requests.

The problem: Coordination between coaches was a nightmare. A student would book with Ana, she'd confirm, then forget to tell the right coach. Coaches had no visibility of their own schedules without calling or texting Ana.

What she built:
- Centralized WhatsApp bot for all club inquiries
- Coach-specific calendar feeds (each coach sees only their own schedule)
- Automatic coach notification when a new booking arrives for them
- Shared availability across all 6 courts

The result: *"We cut internal miscommunication by probably 90%. Coaches get an automatic notification when they have a new booking. I don't have to be in the middle of every conversation anymore. And students get a consistent experience regardless of which coach they're booking with."*

Revenue impact: The club recovered an average of 3 lost bookings per week due to better availability visibility. At €60/booking, that's €180/week — €9,000+ per year.

Carlos — Marbella Beach Padel

Background: Carlos runs an outdoor padel facility in Marbella. Big challenge: weather-dependent cancellations. On rainy days, he gets flooded with messages about whether sessions are still happening.

The problem: Weather cancellations used to take 1–2 hours of his time: monitoring forecasts, deciding, messaging 15–20 students individually, handling the rescheduling chaos.

What he built:
- Weather-triggered cancellation protocol
- If morning forecast shows >70% rain during session hours → automatic message to all affected students
- Students can reschedule via automated response

The trigger message looks like this:

> *🌧️ Weather Update — Your session may be affected.*
>
> *Current forecast shows a high chance of rain for your 17:00 session today.*
>
> *We'll make a final call by 14:00. You'll receive a confirmation message then.*
>
> *Options:*
> *1. Reschedule for another day (reply* **"RESCHEDULE"***)*
> *2. Wait for the final call (reply* **"WAIT"***)*
> *3. Cancel (reply* **"CANCEL"***)*

The result: *"Weather days used to ruin my whole afternoon. Now the system handles it. I check in at 14:00, make a quick decision, the bot sends updates to everyone. I'm back on my surfboard by 15:00."*

Chapter 6: Scaling Up

You've automated the basics. Business is running smoother. Now what?

There are three paths forward depending on your ambition.

Path 1: The Solo Coach Stack (€0–15/month)

This is where most coaches should aim. Automation handles the admin. You stay focused on coaching.

Your tech stack:
- Twilio WhatsApp (pay-per-message)
- Make.com free tier (1,000 operations/month)
- Google Calendar (free)
- Calendly free tier (optional booking page)
- Google Sheets (availability management)

Handles: Up to 200 messages/month efficiently. Perfect for a solo coach with 20–40 active students.

Maintenance: 30 minutes per week to update availability and review any messages that needed manual handling.

Path 2: The Club Upgrade Stack (€30–80/month)

For coaches managing multiple courts or coordinating with other coaches.

Your tech stack:
- Twilio WhatsApp Business API (your own number)
- Make.com Pro (10,000 operations/month)
- A proper booking system (e.g., Acuity Scheduling, €16/month)
- Google Calendar + multi-calendar coordination
- Optional: CRM (Notion or Airtable free tier)

New capabilities:
- Multiple coaches, one unified WhatsApp number
- Booking system with payment integration
- Student profiles (track attendance, preferences, level)
- Automated invoicing

Path 3: The Full AI Platform (€100–250/month)

For ambitious coaches or small club owners who want to build a real competitive advantage.

This is what we built internally: a full Next.js web application backed by:
- **Claude AI** (Anthropic) for natural language understanding
- **Prisma** for database management (student profiles, session history)
- **Twilio** for WhatsApp integration
- **Custom booking logic** with conflict prevention
- **Multi-language support** (Spanish, English, German — critical for international resort clubs)

At this level, your "AI trainer" handles:
- Complex booking negotiations (*"I need 3 courts for a corporate event next Saturday, what packages do you offer?"*)
- Revenue reporting and insights
- Student progress tracking
- Staff scheduling and communication

The ROI math becomes obvious: a club doing €15,000/month in coaching revenue can easily justify €200/month in infrastructure if it frees up 1 full day per week of staff time.

How to Know When to Scale Up

Scale up when:

1. **You're hitting Make.com's free tier limits** (1,000 operations/month)
2. **You're managing more than 50 active students**

3. **You have multiple coaches** under one brand
4. **You're losing bookings** because your availability management can't keep up
5. **Your revenue from coaching exceeds €5,000/month**

Don't scale prematurely. The free setup works beautifully for most coaches. Start there, optimize it, then upgrade only when you have a concrete reason.

The Bigger Picture: AI as a Competitive Advantage

Here's the uncomfortable truth: the padel coaching market is going to commoditize.

More coaches are entering the market every year. Court access is expanding. The difference between a coach who earns €2,000/month and one who earns €6,000/month isn't always skill — it's often **professionalism and availability.**

When a potential student WhatsApps two coaches — one responds instantly with clear pricing, professional booking confirmation, and a smooth experience... and the other responds 6 hours later with a casual "yeah sure, what time?" — who do they choose?

AI automation doesn't make you a better coach. But it **makes you look like one** — even before they step on the court.

That first impression is worth real money.

BONUS: 30-Minute Setup Checklist + 10 Template Messages

✅ 30-Minute Setup Checklist

Use this checklist to get your first AI automation live tonight. Each step takes 3–5 minutes.

Phase 1: Accounts & Infrastructure (10 min)

- [ ] Sign up for Twilio account at twilio.com
- [ ] Note your Account SID and Auth Token
- [ ] Activate WhatsApp Sandbox (Messaging → Try it Out → WhatsApp)
- [ ] Send join code from your personal WhatsApp to confirm connection
- [ ] Sign up for Make.com (free tier)

Phase 2: Build Your First Scenario (10 min)

- [ ] Create new Scenario in Make.com
- [ ] Add Webhook module as trigger
- [ ] Copy webhook URL → paste into Twilio Sandbox "When a message comes in"
- [ ] Add HTTP module or Twilio module to send response
- [ ] Test with "Hello" message — confirm you get a response

Phase 3: Customize Your Responses (10 min)

- [ ] Personalize the 5 response templates (your prices, your location, your name)
- [ ] Set up keyword routing (book → booking template, price → pricing template, etc.)
- [ ] Test each keyword trigger with a message
- [ ] Send a message that doesn't match any keyword — confirm it gets the fallback response
- [ ] Share your sandbox number with 1 trusted student/friend to do a real-world test

You're live. 🎉

📱 10 Template Messages — Copy, Paste, Customize

These are ready-to-use. Replace the [BRACKETS] with your real information.

Template 1: Welcome / Default Greeting

> *Hi! 👋 Thanks for reaching out to [YOUR NAME] — Padel Coach in [CITY].*
>
> *I'm currently on the court, but my assistant has you covered!*
>
> *What can I help you with?*
> 1️⃣ **Booking** — *availability & new sessions*
> 2️⃣ **Prices** — *rates & packages*
> 3️⃣ **Info** — *location, equipment, FAQ*
> 4️⃣ **Cancel/Reschedule** — *change an existing booking*
>
> *Just reply with a number or ask your question directly!*

Template 2: Pricing Response

> *Here are my current rates* 💰

> **Private Lessons**
> • *60 min — €[PRICE]*
> • *90 min — €[PRICE]*
>
> **Group Lessons (2–4 players)**
> • *90 min — €[PRICE] per person*
>
> **Beginner Course (6 weeks)**
> • *€[PRICE] per person (groups of 4)*
>
> **Packages (save 10%)**
> • *5 private lessons — €[PRICE]*
> • *10 group sessions — €[PRICE]/person*
>
> *Ready to book? Just say* **"BOOK"** *and I'll show you available times!*

Template 3: Availability Response

> *Here's my schedule this week* 📅
>
> **[WEEK RANGE]**
>
> *Mon: [TIMES or FULL]*
> *Tue: [TIMES or FULL]*
> *Wed: [TIMES or FULL]*
> *Thu: [TIMES or FULL]*
> *Fri: [TIMES or FULL]*
> *Sat: [TIMES or FULL]*
> *Sun: [TIMES or FULL]*
>
> *Reply with your preferred day & time to confirm your slot!* 🎾

Template 4: Booking Confirmation

> ✅ **Booking Confirmed!**
>
> 📅 *[DAY], [DATE]*
> ⏰ *[TIME] – [END TIME]*
> 📍 *[CLUB NAME] — Court [NUMBER]*
> 🎾 *Coach: [YOUR NAME]*
>
> **What to bring:**
> • *Padel shoes or sports shoes with lateral support*
> • *Water bottle*
> • *[Racket — or note if rental available]*
>
> *Need to cancel or reschedule? Just reply here.*

> *See you [DAY]! 💪*

Template 5: 24h Reminder

> ⏰ **Reminder:** *Your padel lesson is tomorrow!*
>
> 📅 *[DATE] at [TIME]*
> 📍 *[CLUB NAME] — Court [NUMBER]*
>
> *Any last-minute changes? Reply here and I'll sort it out.*
>
> *See you tomorrow!* 🎾

Template 6: Cancellation Acknowledgment

> *Got it — I've noted your cancellation for [DATE] at [TIME].*
>
> 📋 **Cancellation policy:**
> • *24h+ notice: Free reschedule* ✅
> • *Less than 24h: 50% credit toward next session*
>
> *Want to reschedule? Available slots:*
> • *[SLOT 1]*
> • *[SLOT 2]*
>
> *Reply with your choice or say* **"LATER"** *and I'll check in next week!*

Template 7: Payment Reminder

> *Hi [NAME]! Thanks for the great session today* 🎾
>
> 📋 **Session Summary:**
> *[DATE] | [TIME] | [TYPE]*
>
> 💶 **Amount due: €[PRICE]**
>
> **Payment options:**
> 🏦 *Bank transfer: [IBAN]*
> 📱 *Bizum: [NUMBER]*
> 💳 *Online: [LINK]*
>
> *Thanks! Receipt sent on payment confirmation. See you next time* 🚀

Template 8: Waitlist Confirmation

> *You're on the waitlist for [DATE/WEEK]! 📋*
>
> *As soon as a slot opens, you'll be the first to know. You have 2 hours to claim it before the next person is notified.*
>
> *I'll be in touch! 🐸*

Template 9: Slot Opened — Waitlist Notification

> 🎉 **A slot just opened up!**
>
> 📅 *[DAY], [DATE] at [TIME]*
>
> *Reply* **"BOOK IT"** *within* **2 hours** *to claim it.*
>
> *After that, the next person on the waitlist gets notified. First come, first served!*

Template 10: Post-Session Feedback Request

> *Hi [NAME]! How was your lesson on [DATE]? 🎾*
>
> *Quick rating:*
> *5⭐ Loved it!*
> *4⭐ Good session*
> *3⭐ It was ok*
> *2⭐ Some issues*
> *1⭐ Not happy*
>
> *Just reply with a number! Your feedback makes me better 💪*

(If they reply 4 or 5, follow up with):

> *Awesome, glad you enjoyed it! 🙌*
>
> *If you have 2 minutes, a Google Review would mean a lot:*
> *👉 [REVIEW LINK]*
>
> *Thanks [NAME]!*

Final Words

You've now got everything you need to save 10 hours per week starting today.

The setup takes 30 minutes. The returns compound for years.

Start small: Get Template 1 (the welcome message) live first. Then add pricing. Then availability. Build it piece by piece over a few evenings until the whole system is running.

And when you hit a wall — when something doesn't work or you're confused — remember: every coach who built this system had that moment. Push through it. The other side is a business that runs smoother, students who feel better served, and a you who actually enjoys coaching again.

That's the whole point.

Good luck on the court. 🎾
